CIRCUIT.

× SPRAY

A fresh scent, on demand.
Made for Circuit.

01 · THE IDEA

Not a vending machine. Part of Circuit.

The standard SPRAY unit is a black box with its own branding. For Circuit we'd change that. The screen runs in Circuit's pink and lime, shows Circuit's logo on every page, and plays Circuit's own events between sales. Guests see a Circuit feature, not a third-party machine.

Your brand on the screen

Circuit's logo, colours and tone of voice on every screen, from choosing a scent to the thank-you.

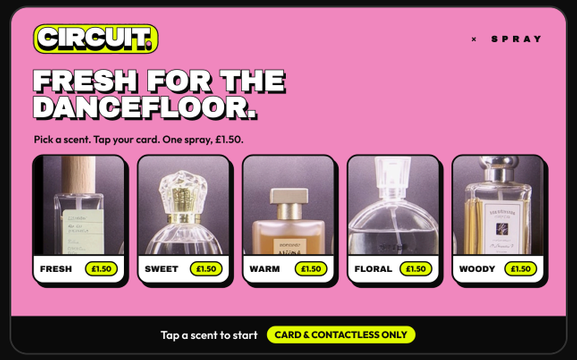

Your next event after every sale

The moment a guest pays, the screen shows Circuit's next big night, like NYE, with a QR code to tickets. Circuit picks it, and it can change any night.

Pink trim on the unit itself

The front accents match Circuit's colours, so the unit looks like it was made for the room.

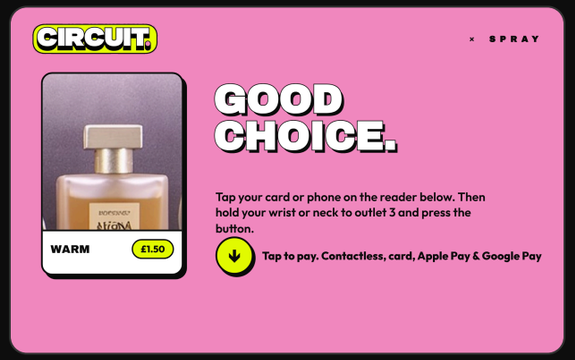

Circuit's screen, from start to finish.

01 — CHOOSE

Pick a scent

Five fragrances on a Circuit-pink menu. £1.50 a spray, card and contactless only.

02 — PAY

Tap to pay

Clear steps: tap the card, wrist to the outlet, press the button. Nothing for staff to explain.

03 — THANK YOU

What's next at Circuit

Straight after paying, guests see Circuit's next event and a QR code to buy tickets.

04 — BETWEEN SPRAYS

Circuit's ads

When nobody's using it, the screen loops Circuit's own event posters. A free ad screen on the wall.

A better night for guests.
Something back for Circuit.

A free ad screen

A 10.1" screen in the toilet corridor or smoking area, running Circuit's event posters all night. SPRAY updates the content remotely whenever Circuit asks.

Ticket sales for the next night

Every sale ends on Circuit's next event and a QR to tickets. It reaches guests while they're out and enjoying themselves, and Circuit controls it.

25% of every spray

Circuit receives a quarter of net sales, paid monthly with a statement from the machine's own data. No invoices, no counting.

Costs nothing, ever

SPRAY supplies, installs, insures, stocks and services the unit. Circuit gives a wall and a socket. 25 W, about the same as a light bulb.

Guests feel fresher

Heat, dancing and a long night: a refresh at midnight is a small thing guests remember and post about.

Then Bonnies, and beyond

The same unit can wear each venue's brand. Once Circuit is live, the same setup can roll out to Bonnies and the other venues.

Designed with the door team in mind.

SPRAY is run by people who work venue doors, so the unit is built around the things that cause trouble on a busy night.

No glass in reach

Bottles are sealed behind the front panel. Guests only touch the screen, the card reader and the buttons.

No cash

Card-only means there's no float and nothing to break in for. It's never a target.

Fixed to the wall

A 30 kg steel body bolted to a solid wall, with a lockable chassis. It can't be knocked over or carried off.

In view of CCTV

We'll place it where cameras and staff already see it, out of the way of busy walkways and fire exits.

Nothing for staff to do

No stock behind the bar and no cash to reconcile. SPRAY handles any complaint, fault or refund directly.

Easy to switch off

Staff can turn it off at the socket in an emergency or if it looks faulty. We're on call for the rest.

Wrist and neck.
Never the face.

Sprays where it should

The five outlets sit flush in the panel below the display. Each one releases a single short, horizontal burst at wrist or neck height. Nothing sticks out to grab or point.

Instructions on the machine

Printed steps on the front panel: choose, pay, guide your hand or neck to the nozzle, press the button. No guesswork after midnight.

Warnings on every unit

A printed warning across the top of the panel: for external use only, avoid eyes and mouth, may contain allergens. One measured spray per payment, so nobody can keep spraying.

If something goes wrong

If spray gets in an eye, rinse it with clean water, the same first aid as any perfume. SPRAY handles every complaint directly and holds £2m public liability insurance for the units.

Real, lawful fragrances

SPRAY is responsible for every fragrance being a lawful cosmetic product and for the unit meeting electrical-safety rules.

1 Printed warning strip 2 Flush outlets, one per scent 3 One spray per payment

The Circuit offer.
Nothing to lose.

01 · YOU EARN

25%

of every spray

About 31p from every £1.50 spray, after VAT and card fees. Paid monthly within 14 days, with a statement from the machine's own sales data. No invoices.

02 · GUARANTEED

£150 a month,

minimum.

If Circuit's 25% comes to less than £150 in a month, SPRAY tops it up to £150. If it comes to more, Circuit gets the higher amount. Even with zero sales, Circuit is paid.

03 · RISK-FREE

60 days

to try it

If it isn't right for Circuit, we remove everything within 7 days and make good the wall. Circuit keeps what it earned. Zero cost, ever.

WHAT CIRCUIT TAKES HOME EACH MONTH (ITS 25%)

SLOW · UNDER 38 A NIGHT	QUIET · 50 A NIGHT	TYPICAL · 100 A NIGHT	BUSY · 250 A NIGHT
£150 guaranteed	£200 /month	£400 /month	£1,000 /month

Illustration, not a forecast. Sprays a night × 13 open nights a month (3 a week) × 31p. 31p = 25% of £1.23, which is £1.50 less VAT at 20% and card fees of about 1.5%. Actual takings depend on footfall, placement and opening hours. If Circuit keeps the unit after the trial, it carries on at the founding partner rate of 25%.

Four steps and Circuit is live.

01 **A 20-minute walk-round.** We pick the spot together: toilet corridor, cloakroom queue or smoking exit, in view of CCTV.

02 **Circuit's screen content.** Logo, colours, event posters and the next event to promote. We build it and Circuit signs it off.

03 **A one-page trial agreement.** 60 days, £150 a month guaranteed, and the unit removed within 7 days if it isn't right for Circuit.

04 **Install.** Fitted outside opening hours in under two hours. One wall, one 13 A socket.

AFTER THE TRIAL

Once Circuit is live, the same Circuit-style setup can roll out to Bonnies and the other venues, each with its own branding.
