

# SPRAY unit.
# Product details.

Wall-mounted fragrance station · five fragrances · card payment

TECHNICAL SHEET · V1 · 2026

# Built for the wall.
# Built for a crowd.

A self-service fragrance dispenser in a sealed, powder-coated steel body with a glossy black acrylic face. Five 100 ml bottles sit in a backlit display; each feeds its own outlet, set flush in the front panel, with a chrome push button beneath. A 10.1" touchscreen and an integrated card terminal handle selection and payment. Connected over Wi-Fi or 4G, every unit reports sales and stock levels to SPRAY in real time.

CE-aligned directives

# 730 wide. 410 high. 222 deep.

Landscape format, about the size of a large flat-screen TV but half as deep as a hand dryer. Mounts flush to a solid wall on a steel bracket. The body is lockable; refills are done from the front by SPRAY.

| | |
|---|---|
| Width | 730 mm |
| Height | 410 mm |
| Depth | 222 mm (225 mm incl. rear fixings) |
| Weight | 30 kg unit · 33 kg packed (82 × 30 × 52 cm carton) |
| Mounting | Bottom edge 1,000–1,100 mm from floor; no side clearance needed |

# Four printed steps. Nothing to explain.

01 **Choose your fragrance.** 10.1" capacitive touchscreen showing the five scents, prices and, between sales, looping promotional content.

02 **Make the payment.** Integrated card terminal: contactless, chip & PIN and mobile wallets. SPRAY runs card-only; the unit has no coin or note acceptor fitted.

03 **Guide your hand or neck to the nozzle.** Five fine outlets sit flush in the flat panel below the display, one per bottle, each marked with a small spray icon. The fragrance leaves horizontally in one short burst; nothing protrudes from the panel.

04 **Press the button.** Five illuminated chrome push buttons. One press, one metered spray; the pump locks until the next payment.

# Every unit reports home.

The controller runs a cloud management system over Wi-Fi or a built-in 4G LTE modem, so SPRAY sees each machine without visiting it.

## Live sales

Every transaction is logged with time, fragrance and value. Venue statements are generated from this data, not estimates.

## Stock and refills

Fill levels per bottle, low-stock alerts and sales-forecast restocking. We refill before a scent runs out, on a schedule that suits the venue.

## Remote control

Pricing, menu, screen content and diagnostics are updated remotely. Faults raise an alert; most are resolved without a site visit.

| | |
|---|---|
| Network | Wi-Fi 2.4 GHz · 4G LTE (SIM supplied and managed by SPRAY) |
| Management | Cloud-based management, inventory management, POS integration, SDK |
| Payment system | Integrated card reader; configured card-only (coin, note and QR modules not fitted) |

# Made for high-traffic rooms.

Powder-coated steel body with a glossy acrylic front and a lockable chassis. No exposed liquids: bottles sit sealed inside the display and the only user-facing parts are the screen, the terminal, the five flush outlets and the buttons. No heating or cooling systems, no moving parts beyond the metering pumps.

LVD

RoHS

### INSTALLATION

Solid wall (masonry, block or studwork with noggins), one 13 A socket within 1.5 m. Fitted by SPRAY in under two hours, outside trading hours.

### SERVICE

Refills and cleaning on a scheduled visit. Twelve-month manufacturer warranty, remote diagnostics and a spare-parts stock held by SPRAY.

### SAFE USE

Fragrance for external use only; avoid eyes and mouth. Products may contain allergens, which the screen and front panel state. Printed warning on every unit.
